1.) BALAJI Pattern

Main.java

```java
package main;
import java.util.Scanner;

public class Main {
    public static void main(String[] args) {

        // BALAJI patterns
        Scanner sc = new Scanner(System.in);
        int a = sc.nextInt();

        for (int i = 1; i <= a; i++) {

            // B
            for (int j = 1; j <= a; j++) {
                if (j == 1 || i == 1 || i == a / 2 + 1 || j == a || i == a) {
                    System.out.print("*");
                } else {
                    System.out.print(" ");
                }
            }

            System.out.print("  ");

            // A
            for (int j = 1; j <= a * 2 - 1; j++) {
                int size = (a / 2) + 1;
                if (i + j == a + 1 ||
                    j - i == a - 1 ||
                    (i == size && j == size) ||
                    (i == size && j >= size && j <= size * 2 - 1)) {
                    System.out.print("*");
                } else {
                    System.out.print(" ");
                }
            }

            System.out.print("  ");
```
